**Program Assessment Plan**

**Date: 10-10-13**

**Program: Counseling/Chemical Health – Angelique Gillis, PhD**

<b>Area or Target for Improvement</b>	Better attendance and participation from students in student groups (i.e., grief group, anger management, stress management, anxiety/depression).
<b>Methods of Measurement</b>	Will write up a student survey that asks what groups the students would find useful, what times would work for students, and also barriers that would prevent them from attending groups. Will also have better advertising for the groups. Will assess group attendance/participation currently and will also assess attendance/participation at the end of Spring Semester 2014.
